PROFESSIONAL SUMMARY

Computer Science and AI Student with a solid foundation in full-stack web development, AI integration, and cybersecurity. Proficient in JavaScript, Node.js, Express.js, RESTful APIs, and JWT authentication, and experienced with prompt engineering and the Gemini API to develop AI chatbots. Hands-on experience with MongoDB, SQLite, Kali Linux, Nmap, Wireshark, Burp Suite, Aircrack-ng, and Bettercap. Led projects such as AI-powered resume analysis, responsive web design, automated video content creation, and comprehensive security assessments. Demonstrated business acumen through ownership and operation of an e-commerce fashion store.

SKILLS

- **Programming:** JavaScript, Python, HTML, CSS
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication (Basic)
- **Databases:** MongoDB (Basic), SQLite (Basic)
- **AI:** Prompt Engineering, Gemini API, AI Chatbots, AI API Integration
- **Cybersecurity:** Kali Linux, Nmap, Wireshark, Burp Suite, Aircrack-ng, Bettercap, Basic Networking
- **Tools:** Git & GitHub, Docker, Postman, VS Code, FFmpeg
- **Operating Systems:** Windows, Linux (Kali), macOS
- **Soft Skills:** Problem Solving, Teamwork, Communication, Fast Learner

WORK EXPERIENCE

• **E-Commerce Store Owner (2018–2023):** Managed full-cycle operations of an online fashion brand, including product sourcing, pricing strategy, inventory control, order fulfillment, and social media marketing. Leveraged data analytics to optimize sales performance and resulted in a 15% increase in conversion rates. Coordinated cross-functional teams to ensure seamless customer service and supply chain efficiency.

PROJECTS

- **YA AI CV – AI-Powered Resume Analyzer:** evaluates CVs against ATS criteria and delivers personalized improvement feedback.
- **Nourgine World:** Responsive frontend website serving as a centralized hub for social media links and creator content, built with HTML5, CSS3, and JavaScript.
- **Wi-Fi Penetration Testing Lab:** Conducted authorized penetration testing on a personal Wi-Fi network using Kali Linux, Kismet, Aircrack-ng, and Bettercap.
- **Android Security Testing Lab:** Performed security assessments on the IsAdvertisement Android application for educational and cybersecurity research.
- **Phishing Awareness Simulation:** Developed simulated phishing pages for training and defensive security purposes using standard web technologies.

EDUCATION

Bachelor of Computer Science and Artificial Intelligence

Faculty of Computers and Artificial Intelligence, Banha University / Expected Graduation: 2027/Current Level: Third Year
