

Yehia Mohamed Hassan Amin

Junior Cybersecurity Specialist

Email: yehia.rashed3200@gmail.com

Phone: +201060076900

LinkedIn: linkedin.com/in/yehia-amin-59b81140b

PROFESSIONAL SUMMARY

Junior Cybersecurity Specialist with hands-on experience in network security, penetration testing, web application security, wireless security, firewall configuration, cloud security fundamentals, and practical offensive-security labs.

Experienced with Kali Linux, Nmap, Wireshark, Burp Suite, Metasploit, Aircrack-ng, Hashcat, Cisco Packet Tracer, Huawei security technologies, and secure application development.

In addition to cybersecurity, I build AI/GenAI applications using RAG, Gemini, LangChain, ChromaDB, FastAPI, Node.js, and secure LLM application practices.

SKILLS & LANGUAGES

Cybersecurity: Vulnerability Assessment, Penetration Testing Fundamentals, Web Application Security, Wi-Fi Security, Network Security, Firewall Configuration

Security Tools: Kali Linux, Nmap, Wireshark, Burp Suite, Metasploit, Aircrack-ng, Wifite, Hashcat, Bettercap, Cisco Packet Tracer

AI & Development: RAG, LLM Applications, Gemini API, LangChain, ChromaDB, FastAPI, Node.js, Python, JavaScript, React, HTML, CSS, AWS

Languages: Arabic (Native), English (B2)

WORK EXPERIENCE

Independent AI & Cybersecurity Project Developer

2026 - Present

Built practical cybersecurity labs and AI applications involving network security, web security, penetration testing, RAG, multimodal AI, and secure LLM workflows using Gemini, LangChain, ChromaDB, Kali Linux, Nmap, Burp Suite, and Metasploit.

Generative AI - CIB Summer Internship Program

July 2026

Completed practical training in Generative AI principles, approaches, and best practices.

E-Commerce Store Owner

2018 - 2023

Managed sourcing, pricing, inventory, fulfillment, marketing, customer service, and data-driven sales optimization, contributing to a 15% increase in conversion rates.

PROJECTS

- Cybersecurity Portfolio Website** - Personal portfolio showcasing certifications, projects, and security labs.
- Wi-Fi Penetration Testing Lab** - WPA2/WPA3 security assessment using Kali Linux, Aircrack-ng, Wifite, and Hashcat.
- Web Application Security Lab** - Vulnerability assessment and reconnaissance using Nmap, Burp Suite, and Exploit-DB.
- Metasploit Exploitation Lab** - Exploitation, Meterpreter sessions, and post-exploitation techniques in a controlled lab.
- Android Security Testing Lab** - Android penetration testing using Metasploit, Meterpreter, and Genymotion.
- Phishing & Social Engineering Simulation** - Security awareness lab using SET Toolkit and Zphisher.
- Enterprise Network Security Labs** - Cisco Packet Tracer labs covering VLANs, Routing, ACLs, EtherChannel, and Network Security.
- Huawei Firewall Security Lab** - Security zones, firewall policies, Trust/DMZ configuration, and traffic filtering.
- AWS Cloud Labs** - Hands-on experience with IAM, EC2, S3, VPC, and cloud security fundamentals.
- YA CV AI** - AI-powered ATS Resume Builder & Resume Analyzer (Node.js, Gemini API, PDF Export).
- NØURGINE World** - AI Creator Hub & Bio Links Platform with integrated AI Assistant.
- Sakina AI** - Evidence-grounded mental wellness assistant using RAG, trusted-source citations, safety classification, crisis handling, and bilingual Arabic/English interaction. Designed with end-to-end security controls for inputs, APIs, secrets, and AI workflows.
- Nabta AI** - Grounded GenAI study workspace that turns PDFs and notes into source-backed explanations, study guides, quizzes, mastery tracking, Voice Tutor, and AI Viva. Designed with end-to-end security controls for uploaded content, retrieval, APIs, and AI interactions.
- NOR AI** - Voice-first visual assistant for blind and visually impaired users using multimodal AI for scene understanding, OCR, currency/product assistance, color recognition, and spoken Arabic/English interaction. Designed with end-to-end security and privacy controls for camera data, APIs, and user interactions.

EDUCATION

Bachelor of Computer Science and Artificial Intelligence

Benha University, Egypt

Expected Graduation: 2027

CERTIFICATIONS & COURSES

- Penetration Testing & Application Security - Cybersecurity Academy (NTI / EG-CERT / NTRA) - 2026
- BGP Security - RIPE NCC Academy - Sep 13, 2026
- Network Security - Huawei ICT Academy - Sep 19, 2026
- Certified Cybersecurity Educator Professional (CCEP) - Red Team Leaders - Sep 8, 2026
- Certified LLM Security Professional (CLLMSP) - Red Team Leaders - Sep 7, 2026
- Gemini Certified Student (K12) - Google for Education - Aug 30, 2026
- CCNA: ENSA - Cisco Networking Academy - Jul 29, 2026
- CCNA: SRWE - Cisco Networking Academy - Jul 29, 2026
- HCIA-Security V4.0 - Huawei ICT Academy - Jul 29, 2026
- HCIA-AI - Huawei ICT Academy
- CS50's Introduction to Cybersecurity - HarvardX - Jun 2026
- Endpoint Security & Introduction to Cybersecurity - Cisco Networking Academy - Jun 13, 2026
- Front End Web Development (120 Hours) - ITI - Aug 29, 2024
